

Participation in the prestigious **Golden Juggernaut INNOTECH Forum** at Chişinău Arena on November 21-22, 2024

The **Golden Juggernaut InnoTech Forum 2024** (www.innotechforum.vip) is the largest forum dedicated to innovation, technology transfer, business development, and skills enhancement in Moldova, Georgia, Armenia, Kazakhstan, and Romania.

The forum, which will be held in a hybrid format on November 21-22, 2024, at the Chişinău Arena and online (via Zoom), is the venue where national and international leaders, top companies, and technology experts present innovative solutions to help businesses adapt to new technological challenges.

It's all about developing the professional skills demanded by the labor market, exploring career opportunities, and expanding professional networks!

The event language is English, with simultaneous translation into Romanian and Russian (Masterclasses on AI and other topics are available in Romanian, Russian, or English upon request).

Why it's important not to miss the chance to participate:

Explore career opportunities and expand your professional network:

- At the Forum, you will find a dedicated area where you can interact directly with company representatives or experts. This is the perfect opportunity to have face-to-face discussions with potential employers, gain a better understanding of industry needs, and identify internship or job opportunities.
- By participating in networking with professionals from various sectors and countries, you will be able to build a valuable network of contacts for your professional future. Interaction with experts and business leaders can open doors to unexpected opportunities and future collaborations.
- The Forum also offers an "Interactive Connection Network" – a unique digital space where participants can leave their contact and business information. So, even if you don't have the chance to speak personally with someone, you can be assured that your details are visible to potential partners, employers, or industry experts, opening up new collaboration opportunities on a global level.

Developing skills in using artificial intelligence through participation in masterclasses and practical sessions:

All presentations and masterclasses led by selected speakers and experts are based on the "Apply Immediately" principle, meaning that after attending the presentations or masterclasses, you will be able to instantly put the knowledge gained into practice.

Here are some of the masterclasses you can attend to gain useful skills:

- Masterclass on increasing managerial efficiency and productivity through AI and automation
- Masterclass on using artificial intelligence in SMM (Social Media Marketing)
- Masterclass on creating market-demanded online courses
- Masterclass on using artificial intelligence for preparing and delivering public speeches, and more.

You will discover how to apply artificial intelligence to streamline daily tasks, saving time and resources. This will help optimize your studies and personal projects, elevating your professional skills to a new level.

At this forum, **the launch of the Golden Juggernaut InnoTech International Award** will take place. The award will be presented in May 2025 and will cover three fields: education and skills, innovation, and research. This is a unique opportunity for those who wish to showcase their achievements and gain international recognition. The participation criteria will be announced during the forum, so don't miss this chance!

Through **advanced AI solutions, digital transformation, cybersecurity, and InnoTech** for various industries such as HoReCa, healthcare, retail, education, and more, we provide solutions to make your business more efficient. Are you thinking of boosting your business's efficiency? We've got the solutions!

Additionally, the **Golden Juggernaut Fund** will be established, dedicated to supporting vulnerable individuals, especially women and children over the age of 9. The fund will offer short, pre-recorded courses to equip them with new skills and provide them with the opportunity to start a career quickly. Participate and become part of the change!

Organizers: The National Agency for Research and Development and the Association for Supporting Innovation and Sustainable Development "Impuls," under the patronage of the Ministry of Education and Research of the Republic of Moldova.

Reserve your spot by visiting our official website at www.innotechforum.vip or contacting us at support@innotechforum.vip, and join innovators from across the region!

Don't miss the opportunity to network, understand future trends, and gain valuable insights that will accelerate your business to the next level.
